

Protection, portation, presentation. The three criteria of any baton scabbard. Each carrier must define a compromise between security and speed of presentation. It must provide a level of protection without compromising access. The case must secure the baton without hindering rapid deployment.

On the street, there can be no tolerance for second best. A scabbard that fails may compromise baton access during the critical point of a confrontation.

Under the most severe tactical conditions, ASP Scabbards do not fail. They combine protection with access. They secure the baton during transport. They allow a firm grip and rapid presentation. ASP Scabbards excel. Under the most severe tactical conditions, they have no equal.

Each day the nation's most respected and tactically sophisticated law enforcement agencies trust their safety to ASP. Each day ASP Scabbards are the first choice of those who cannot afford less.

## Snap-Loc Belt Loop

Designed for military or special operations, the rotating polymer belt loop of ASP scabbards will clip onto all MOLLE equipped vests as well as military or duty belts. The cases swivel to 7 distinct positions or may be locked in place. A retracted baton may be rapidly presented, yet is securely retained during dynamic confrontations.

## SideBreak

The foundation of the ASP gallery of Baton Scabbards. The SideBreak® rotates to 7 distinct positions or may be locked upright on the duty belt. A retracted or expanded Friction® Baton may be rapidly presented, yet is securely retained during dynamic confrontations. Expanded batons may be presented out the side of the carrier. Available in Black, Ballistic, Basketweave and ASPtec® finishes.

## Envoy

The Envoy Scabbard is designed to allow one motion reaction and casing of an expanded Talon Baton. It allows rapid transition between the baton, flashlight and restraints. The case rotates to 7 distinct positions on the belt or MOLLE vest.

## Federal

A compact, reduced form carrier for the Friction Baton. The Federal® Scabbard is designed for those officers who prefer a closed front ASP case. The carrier adjusts to a variety of belt widths. It rotates to 7 distinct positions and will retain a retracted or extended ASP Baton.

## Revolution

An extremely secure low profile scabbard with a protective hood that rotates to either side. Compatible with ASP Talon Batons.

**SideBreak Scabbards** allow rapid presentation of an expanded baton.

**Federal Scabbards** are compact. They securely retain the ASP Baton.

**Envoy Scabbards** are easily attached and rigidly secure.

**Revolution Scabbards** are protective, secure and easily attached.

Belt clips may be sized for civilian or duty belts. They incorporate a slide-in belt width adjuster.

Envoy Scabbards are available for the Talon Series 40, 50 and 60 lengths.

The retaining bar of ASP polymer scabbards can be adjusted for ease of presentation or strength of retention.

The hex tool in polymer baton scabbards is removed with the double lock pin of a handcuff key. It is used for both adjustment and disassembly.

SideBreak Scabbards are fitted with spare retention screws.

The SideBreak Scabbard retains the baton tip with four plates which flex open to allow carry of an expanded baton.

Federal Scabbards retain the baton tip with a single plate which can be bypassed by angled insertion of the baton.

The Revolution hood is easily pressed down and rotated to either side.

The polymer SideBreak Scabbard will flex open to present an expanded baton.

The closed bottom of the Envoy and Revolution Scabbards allows Talon Batons to be closed directly into the scabbard.

Cases are adjustable to fit belts up to 2.25" wide, or MOLLE gear.

SideBreak, Federal, Envoy, and Revolution Scabbards rotate to 7 distinct positions. They prevent the baton from turning cap down on the belt.
